

THE

ULTIMATE

Engineered to Ensure Optimal Strength and Durability

When off-roading Jeep® owners modify their front axles for even better performance over rocks, across sand, and through mud, Dana takes notice. The Ultimate Dana 60® front axle incorporates many of these modifications and innovations, so you get premium performance right from the start. Engineered to be a direct-fit, bolt-in solution for the Jeep Gladiator JT, Ultimate Dana 60® front axles are built for superior strength inside and out.

The full-float design of the Ultimate Dana 60® rear axle means that the vehicle weight is carried by the housing instead of the shaft. So, you can enjoy a greater load-carrying ability wherever your Jeep takes you. The Ultimate Dana 60® rear axle features Spicer® 35 spline SAE-4340 nickel chromoly steel axle shafts to help meet the rigors of off-road, providing maximum strength and durability for vehicles with larger tires.
