***Commercial Vehicle Series Driveshaft  
Components for Scania Trucks***

Every original Spicer® driveshaft is designed, engineered, and manufactured by Dana to the highest standards of quality and performance expected by original equipment (OE) manufacturers – because Spicer is THE original equipment manufacturer. Spicer driveshafts provide the top performance, reliability and durability of OE products, in a robust, cost-effective, virtually maintenance-free aftermarket solution.

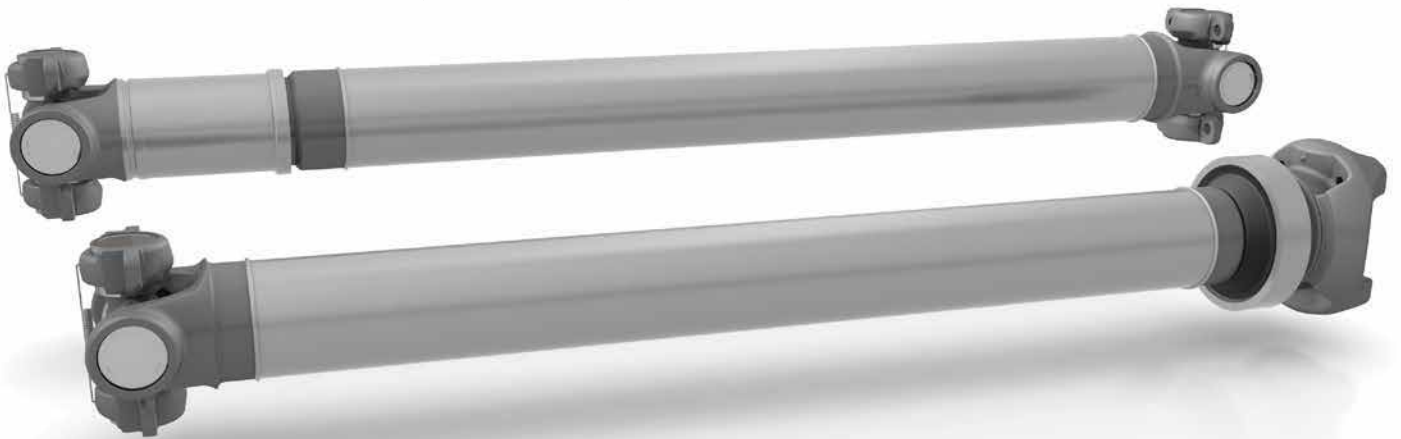

As the global leader in driveline technology, Dana combines its commitment to innovation and original equipment excellence with the quality of its Spicer products to deliver superior solutions that are driving the aftermarket industry.

### The Spicer for Scania Story:

Dana has a long history of supplying Spicer driveshafts for Scania heavy-duty commercial vehicles as an original equipment manufacturer, using specialized equipment and proprietary manufacturing processes including friction welding to meet the unique needs of Scania vehicles.

Spicer driveshaft components were also adapted for Scania's aftermarket replacement needs, utilizing MIG/MAG welding

for universal fabrication, scalability and production, while keeping the original equipment properties, dimensions, and quality of the driveshaft components intact. Spicer original driveshaft components are now available for virtually every Scania model currently in production, and to service all of Scania's original equipment and aftermarket vehicle needs.

Select your Spicer for Scania replacement driveshaft components – or build your own driveshaft from Spicer components. Components to build Spicer driveshafts for Scania – from the U-joints to the tuber and more – are now available for the aftermarket.

Select the Spicer original driveshaft components you need, or build your own OE driveshaft from 100% Spicer original parts. Visit the Spicer website at [www.SpicerParts.com](http://www.SpicerParts.com), select your components, and start building your complete Spicer driveshaft package.
