

VICTOR REINZ®

Victor Reinz® Gaskets for European and Asian Vehicles

- Today, over half of new vehicles sold in North America carry foreign nameplates
- Foreign nameplate coverage is part of our broad, rapidly-expanding line
- Victor Reinz products are original equipment (OE) on many foreign nameplates
- Victor Reinz is OE quality for the aftermarket repair environment for all globally-respected vehicle brands

Let Us Help You Build Your Business

Victor Reinz® is the global leader in OE gasket engineering, technology, and manufacturing, supplying virtually every engine manufacturer in the world with products for major applications. For European brands, Victor Reinz offers unmatched coverage, with exclusive gasket sets engineered by experts. Now celebrating 110 years of providing trusted sealing solutions, Victor Reinz is proud to bring our European expertise to the US market.

Popular Foreign Nameplate Models on the Road Today:

BMW 3-Series

Toyota Camry

VW Golf

Top 5 Victor Reinz Products:

Valve Cover Gaskets

- Multiple sealing beads seal less-than-straight valve covers
- Compression limiters eliminate the chance of over-tightening
- Engineered cross-section ensures perfect fit

Gaskets with Wave-Stopper™ Technology

- Prevents over-compression of the bore bead
- Topographic wave height profile
- Manufactured from full hard stainless steel
- Premium FKM coatings

Cylinder Head Gaskets

- Superior combustion sealing capabilities
- Aftermarket coatings to seal minor surface imperfections
- Balanced design for optimal bolt load distribution

Oil Pan Gaskets

- Carrier design increases strength and provides for easy installation
- Compression limiters prevent over-tightening
- Application-specific materials reduce level of torque loss

Turbocharger Mounting Kit

- Turbocharger kits are the perfect solution for the removal and replacement of turbochargers. These complete add-on kits contain the gaskets and replacement parts necessary to ensure efficient and professional results.

- Top-quality materials
- Saves time on component procurement
- Wide range of applications available
