## Victor Reinz® MaxDry MeshGuard™ Intake Gaskets

### Victor Reinz® MaxDry MeshGuard™ Intake Gaskets for Chrysler 3.7L and 4.7L

Victor Reinz developed the MaxDry MeshGuard to maximize the lifespan of repaired or remanufactured Chrysler Products V6 and V8 engines. These popular engines are found in late model Dodge/Ram, and Jeep vehicles.

# Victor Reinz® MaxDry MeshGuard™: Protecting the Life of Your Engine

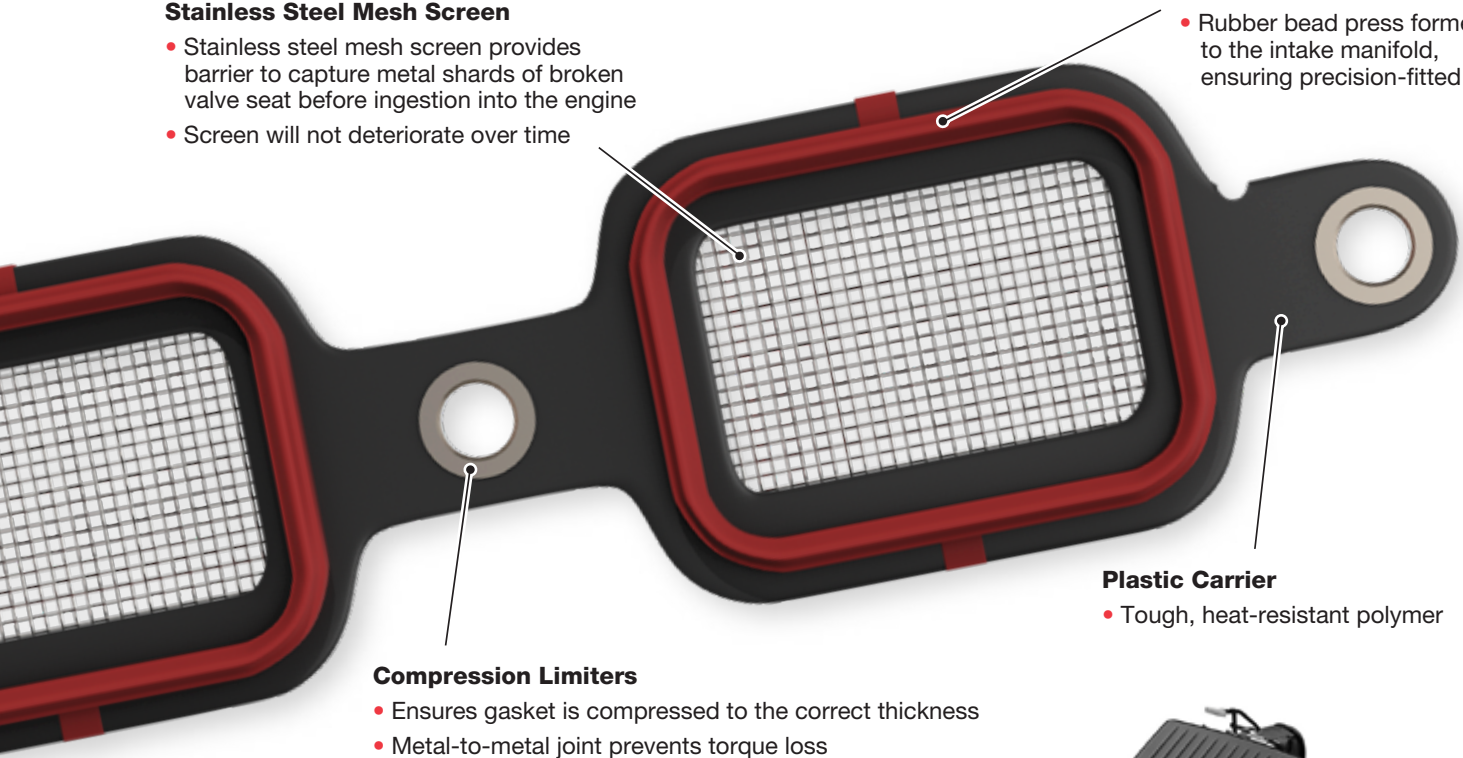

The MaxDry MeshGuard not only provides maximum sealing ability, but also safeguards the cylinders from damage. Its one-of-a-kind screen barrier filters out debris and protects your engine in the event of valve seat breakage—ultimately increasing the lifespan of your engine. It is especially valuable to prevent warranty claims on newly rebuilt or remanufactured engines that previously suffered valve seat failure - because valve seat debris can get lodged in the intake manifold, or elsewhere. This debris can break loose at any time and cause major engine damage, unless stopped by MaxDry MeshGuard.

## Stainless Steel Mesh Screen

- Stainless steel mesh screen provides barrier to capture metal shards of broken valve seat before ingestion into the engine
- Screen will not deteriorate over time

## Silicone Rubber Bead

- Rubber bead press formed to the intake manifold, ensuring precision-fitted seal

## Plastic Carrier

- Tough, heat-resistant polymer

## Compression Limiters

- Ensures gasket is compressed to the correct thickness
- Metal-to-metal joint prevents torque loss

## Victor Reinz® MaxDry MeshGuard™ Intake Gaskets for Chrysler, Dodge/Ram and Jeep 3.7L and 4.7L

Victor Reinz Part Number	Application	Years
11-10689-01	3.7L V6 226 CID	2002-2009
11-10690-01	4.7L V8 285/287 CID	1999-2007
