## Bracketless Axles Provide Unrivalled Durability

For maximum strength and durability, the team on this build knew the only answer could be Ultimate Dana 60<sup>®</sup> axles. However, until recently, the Ultimate Dana 60<sup>®</sup> Crate Axle was only available with brackets that made it an ideal bolt-in upgrade for Jeep<sup>®</sup>, Wrangler or Gladiator. A pair of Ultimate Dana 60<sup>®</sup> Bracketless Crate Axles<sup>®</sup> allowed the builders to add the brackets that best suited this Chevrolet<sup>®</sup> Colorado—rather than remove the brackets from the UD60<sup>®</sup> axle, then design custom brackets to fit.

And as satisfying as it can be to run parts from trusted brand names like Factor 55<sup>®</sup> and ARB<sup>®</sup>, the engineers on this build didn't stop at just a custom bracket solution. A custom front lift kit, drag link, spare tire carrier, tie rod, and custom rock sliders round out this hard-hitting rig.
