

## Genuine Spicer® Commercial Vehicle Steering Shafts

Spicer® steering shafts are designed, engineered, and manufactured by Dana to the highest standards of quality and performance expected by original equipment (OE) manufacturers—because Spicer is the original equipment manufacturer. Spicer steering shafts provide the top performance, reliability, and durability of OE products, in a robust, high-quality aftermarket solution.

### Genuine Spicer steering shafts features and benefits:

- Robust design with a high torque capacity: 710 Nm
- Made of steel to provide high levels of durability vs. other materials
- Fully painted to protect against corrosion
- Glidecote on the slip spline: nylon coating reduces NVH (noise, vibration, and harshness), prevents spline wear, and extends service life
- Serviceable design with snap ring retention universal joints so customers can replace just the universal joints\* if needed, not the entire steering shaft
- Coverage for popular Volvo® part numbers:
  - 5005346-1
  - 5007976-4
  - 5007976-5
  - 906860-51
  - 916557-105SX
  - 916657-133SX
  - 916657-65SX
  - 916657-77SX
  - 923000-1SX
  - 923310-11

\*Steering shaft universal joint part number is 5-103X
