

NEW! Victor Reinz® Reinzosil® RTV Silicone

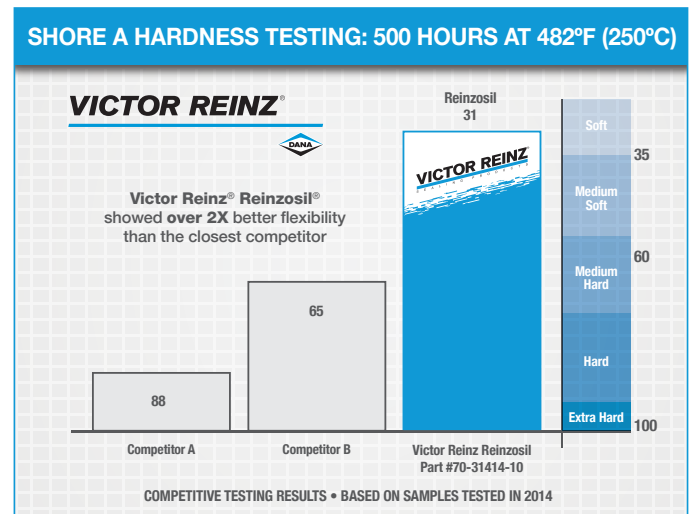

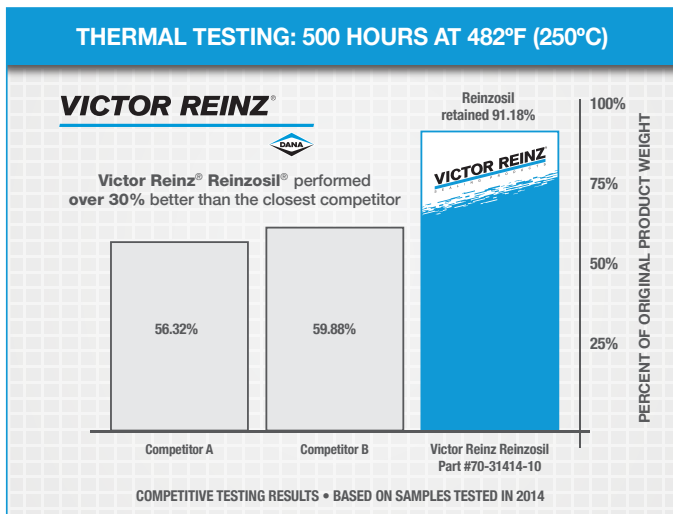

Date: **August 16, 2021**

To: **All Dana Aftermarket Group Victor Reinz® Sealing Product Customers**

Dana Incorporated is excited to introduce Victor Reinz® Reinzosil®, the ultimate room temperature vulcanizing (RTV) silicone sealant. This highly elastic universal sealing compound is resistant to mineral oils and numerous synthetic oils, lubricants, gasoline, diesel/biodiesel fuels, greases, hot and cold water, detergents, sunlight, ozone, and salt water. Reinzosil is fast-curing, low-odor, noncorrosive (pH neutral, non-acidic, non-oxidizing), and will not harm oxygen sensors—making it ideal for use on synthetic parts and electrical components. Reinzosil is so versatile that it can replace a dozen or more other varieties of RTV, eliminating excessive SKUs and saving valuable inventory space.

Part Type	Description	Package	Part Number
Reinzosil RTV Silicone	Universal Silicone Sealing Compound	25ct. 70ml Tube	70-31414-10

Unlike competitor products—which may incorporate plasticizers of minor quality such as calcium carbonate or limestone—Reinzosil will not shrink or lose weight in high-heat environments. Extensive laboratory testing has proven that Reinzosil remains pliable after 2,000 hours when subjected to temperatures of -58°F to 482°F, and briefly up to 572°F.

Reinzosil can be applied to both vertical and overhead surfaces and is ideal for use on two-dimensional flat surfaces where there is a sealing gap of $\geq 0.006''$, such as gasket intersections and components originally sealed with RTV by the manufacturer. Common applications include intake manifolds, valve covers, axles, gearboxes, and oil pans.

Pricing information for Reinzosil can be found on your DanaAftermarket.com account. Please contact your Dana representative for additional information. Thank you for your continued support of Dana Aftermarket products!
